# WELCOME TO HOTEL BRISTOL BUJA!

Welcome to Hotel Bristol Buja in the heart of Abano Terme

Once you have entered, all you need to do is leave your hectic pace behind, switch off from everyday life, release tensions and dip into our thermal water pools.

At Hotel Bristol we have set ourselves the goal of giving you an all-round holiday based on Wellness and Health, which we have called **BWell**: Bristol Wellness Concept, which consists of:

- Relaxation, rest, re-energising
- Healthy and balanced nutrition, yet rich in taste
- A personalised plan focused on individual needs: from pain relief, postural rehabilitation, and slowing structural ageing, to motor rehabilitation and muscle strengthening
- Entertainment and socialising activities, exploring the surrounding area and its flavours.

Wishing everyone a wonderful stay

The Buja Family and Staff

# ARE YOU READY TO IMMERSE YOURSELVES IN OUR WORLD OF THERMAL WELLNESS?

## RELAXATION

### Thermal pools

Three thermal pools are at your disposal in the private park, and one indoor pool communicates with a second outdoor pool. They are provided with various types of hydro-massage (barrels, loungers, whirlpools) and cervical waterfalls, at a temperature of about 35°C. The third pool is more suitable for swimming, with a water temperature of about 32°C.

The 'Hydrorelax' thermal water pool is a small pool provided with 8 hydro-massage beds and a Kneipp path.

The pools are open daily from 8.00 am – 7.30 pm.  
Out of respect for everyone, we require you to take a quick shower before entering the water.  
The use of a swimming cap is compulsory.

### Loungers in the relaxation area

Loungers with mattresses are available for your relaxation, either at the poolside or in the garden in fine weather. Please contact our lifeguard for assistance. Loungers cannot be booked for your entire stay.

## THE SPA

### Three terms can describe Wellness: Inferno, Purgatory and Paradise.

Located on the ground floor, the spa can be accessed from the indoor pool. Entry is allowed from age 16. Open every day from 10.00 am – 7.00 pm.

**INFERNO:** our sauna area is the realm of warmth! Here you can find:

- **Steam bath** (temperature 45-48° C and relative humidity 98%)
- **Finnish Sauna** (temperature 80° -100° with relative humidity 10% -20%)
- **Mediterranean Sauna** (temperature 60° with relative humidity 20% -40%)
- **Ice waterfall** (for its characteristics, it is the cold reaction that best matches the heat bath of the Finnish sauna or steam bath.)
- **Several reaction showers** and emotional showers.

**PURGATORY:** We have completely renewed our physiotherapy pool (35° C) with new hydromassages and countercurrent swimming. In a corner, a relaxation area with chaise longue and armchairs, with herbal teas point, in front of the fireplace.

**PARADISE:** a room of absolute relaxation with a beautiful Himalayan salt wall, that combines the benefits of mineral salt with the relaxing effects of soft light. The stove regulates and maintains the intensity of heat and humidity in the room, and creates conditions that favor the natural ionization process of mineral salt.

## Sauna-Advisor

Our tips for preparing the body for the alternating dance of hot and cold, in four steps.

### 1. Where do you start?

First of all, cleanse your body with a refreshing shower.

To combine wellness treatments, we suggest starting with lower temperatures (Mediterranean bath, steam bath), where the humidity allows your skin to accumulate heat, dilating the pores in a natural way. You can then finish with high temperatures (Finnish sauna), where the drier air provides a detoxifying effect, releasing toxins and stimulating your central and peripheral circulation.

Avoid wearing tight, sweaty or previously used clothing in thermal pools with chlorine.

### 2. Take a break between sessions.

After each treatment, take a short regenerating break, even only for 10 minutes, to soothe your body and fully enjoy the next wellness session.

Recover the liquids lost through sweating with a cool drink and take a refreshing and invigorating emotional shower to bring your body back to an ideal temperature.

### 3. Do not exceed 15 minutes of treatment time.

Whether you choose the sauna or the steam bath, do not stay more than 15 minutes inside the cabin for any single session.

### 4. And lastly...

Treat yourself to a burst of energy and tone the heartbeat with the cold Ice waterfall: a unique vasodilatation and vasoconstriction exercise. Simply pick up some ice, place it on the ground and step on it barefoot to start the contrasting reaction. Then continue by rubbing the nerve points of the lymphatic system such as the wrists, ankles and upper inner thighs with a few chips of ice. The transition from the warm environment to the cold shower stimulates the circulation and makes the cardiovascular system more efficient.

## KEEP FIT!

### Gym

This is our fitness area, equipped with Technogym machines for cardio and muscle strengthening exercises. It's situated on the first floor, in the Maison BB, after the massage and physiotherapy rooms.

It's open every day from 8.00 am – 8.00 pm.

Entry is only permitted if you are properly dressed and wearing clean trainers (no swimming costumes, flip flops or bare feet).

### Water aerobics

We provide a fun and healthy fitness session in the thermal pool with a qualified instructor.

See the notice board for the scheduled times.

### Bikes

At our hotel, we provide city bikes free of charge. Please ask the concierge for the keys.

### Tennis court

Our clay tennis court, accessible at a fee by prior booking, is located beyond the pool area, in our park. We do not provide tennis rackets or balls.

### Golf

On our property, towards the car park, you will find putting greens and bunkers and a par 3 hole for practising.

Ask the concierge to book tee-offs at the Euganean Hills Golf Clubs (there are no less than 3!), with green-fees at preferential prices. We can also book a driving range and individual lessons with a multilingual instructor for you.

## HEALTH, WELLNESS AND BEAUTY

### Thermal Centre

The Thermal Centre is situated on the ground floor. Mud-balneotherapy sessions are carried out here. It's open every morning, including Sundays, from 5.00 am – 12.00 pm.

We recommend that you book your thermal treatments (mud baths, thermal baths and massages) before your arrival, free of charge. We do our best to confirm the time you desire (we cannot guarantee the therapist).

### Maison B.B.

Our Maison BB, with its extensive range of massages, rituals, wellness and beauty treatments offered in this brochure, is situated on the first floor. It's open every day from 8.00 am – 6.00 pm.

Here you will find the SPA Desk: our SPA Manager and the Bristol Buja SPA Team are at your disposal. Please go there for advice and bookings, or call extension 611.

### Doctor's surgery

A medical examination is compulsory before gaining access to thermal treatments. Our doctor will assess your state of health and prescribe, with your agreement, the course of treatment best suited to your needs and therapeutic goals.

The doctor's surgery is situated near the SPA desk on the first floor. The spa doctor receives by appointment, usually in the morning.

### Inhalation therapies

The inhalation therapy department is also situated in the Maison BB. You can enter without book-ing every morning, including Sundays, from 8.15 am – 1.00 pm.

### Shop Corner

On the first floor we have opened our Shop, where you can find the products from our DIBI Milano face and body beauty range from Maison B.B, the sauna kit and gift ideas. Ask our SPA Manager if you want to make any purchases.

# THERMAL MUD AND WATER

## 'A NATURAL MEDICINE WITHOUT ANY SIDE EFFECTS'

The beneficial secret lies in the water and its unique underground route, during which it is enriched with specific trace elements.

It starts in the Pre-Alps, reaching a depth of 3,000 metres, and re-emerges in the Euganean basin at a temperature of 80°C.

The mud, however, is taken from a small lake situated in the renowned town of Arquà Petrarca, birthplace of the poet Francesco Petrarca. It is put into large maturation tanks, where thermal water flows constantly at a temperature of 70°C.

The composition of saline-bromine-iodine water and constant exposure to sunlight result in a gradual change in the chemical and physical composition of the clay.

Thermal stress encourages the development of non-pathogenic microbial colonies, diatoms and cyanobacteria, which are responsible for the beneficial effect of the mud, now mature and ready for thermal application.

Our thermal centre, with its own springs, is included in the OTP monitoring network of the University of Padua to control the maturation process and quality of the thermal mud.

## ALL THE BENEFITS OF MUD-BALNEOTHERAPY

- **Analgesic action:** the mud stimulates the production of endorphins, a natural analgesic that raises the pain threshold.
- **Anti-inflammatory action:** the mud stimulates the production of cortisol, natural 'cortisone', which slows down the flare-up of symptoms.
- **Helping the immune system:** the mud makes the body more resistant to infections, activating its natural defences.
- **Metabolic stimulation:** the temperature of the mud and the treatment protocol encourage vasodilation and stimulate body renewal.
- **Stimulation of cartilage reconstruction:** repeated cycles of mud therapy encourage self-healing processes in the body.
- **Detoxifying action:** sweating induced by the application of hot mud purifies the body.

## PATHOLOGIES THAT CAN BE TREATED WITH MUD THERAPY:

Osteoarthritis and other degenerative conditions in the chronic (non-acute) phase such as

- Osteoporosis
  - Spondyloarthritis
  - Arthritis and psoriatic arthritis, fibromyalgia
  - Extra-articular rheumatism in the non-acute phase
  - Tendinitis and lumbago
- 
- **Purifying action on the skin:** the application of thermal mud on the dermis has the effect of a gentle scrub.
  - **Preventive action:** mud therapy prevents osteo-articular pathologies and disorders related to incorrect lifestyles and postures.

### Medical assistance

Medical examination for admission to treatment	€ 45,00
Follow-up visit during your stay	€ 20,00
ECG (electrocardiogram)	€ 45,00

10 therapeutic massages 25-min.

10 aerosols or inhalations with thermal water

Bathrobe for treatments

€ 1020,00

€ 867,00

# REHABILITATION THERAPIES

Thanks to an exclusively individual working method, Hotel Bristol Buja offers its guests comprehensive recovery and rehabilitation programmes. Motor rehabilitation programmes are carried out partly in the gym and partly in water in the physiotherapy pool, a thermal water pool equipped for individual sessions.

## Our specialities:

- **Physiokinesitherapy**

This aims to prevent, treat and rehabilitate correct muscular, myofascial and joint function.

It restores the coordination of movement of one or more limbs or the whole body in general.

- **Aquatic therapy**

This involves rehabilitative exercises in thermal water. Exercising in warm water is made easy and painless thanks to unloading exercises, resulting from the reduction of the effects of gravity, which allows the patient to become aware of the motor possibilities of their joints, relax their muscles, decrease their perception of pain, and increase their mobility so that recovery times are quicker.

- **Instrumental therapies**

Instrumental therapies refer to those therapies that, using machines, Tecar, laser and ultrasound, are able to relieve pain, absorb swelling, decontract the muscles and help tissue regeneration.

- **Osteopathy**

A holistic and therapeutic method of care and prevention that uses the hands as a diagnostic tool to highlight dysfunctions and lack of tissue mobility, which lead to an alteration in a person's general balance. It is also a means of treatment to restore harmony and mobility in the joints, the spinal column and in the myofascial, visceral, craniosacral, psychosomatic, vascular and energy systems.

- **Pain therapy**

At our hotel, pain is also treated in the acute phase when it becomes an unwelcome companion in our daily lives. This is done with the collaboration of a doctor with expertise in acupuncture and trigger point therapy.

## Rehabilitation

Physiokinesitherapy	25 min.	€ 40,00
	55 min.	€ 70,00
Postural exercises	25 min.	€ 40,00

Our physician, in agreement with the temporal needs of our guest, proposes and prescribes a cycle of customized therapies to obtain the desired benefits.

# MASSAGE AND WELLNESS TREATMENTS

Massage is the oldest form of physical therapy, used since ancient times to relax muscles, relieve tension and alleviate fatigue.

Massage therapy, consisting of different manual manoeuvres, brings the body substantial benefits, such as improved blood and lymphatic circulation, muscle relaxation, psycho-physical wellbeing and relaxation of the whole body, and ... at the Hotel Bristol Buja, all this means excellence!
